CAO TAN CONG

SOFTWARE DEVELOPER | FULL-STACK WEB & MOBILE ENGINEER

CONTACT INFORMATION

Phone:
0362 111 265

Email:
caotancong2003@gmail.com

Address:
Tan Son Ward, Ho Chi Minh City

Website / Portfolio:
https://congcao.io.vn

GitHub:
https://github.com/CongCaoIT

Date of Birth:
26/10/2003

EDUCATION

Ho Chi Minh City University of Industry and Trade (HUIT)

Major: Software Engineering | 2021 - 2024

- **GPA:** 3.37 / 4.0
- **VSTEP English:** B1

INTERESTS

Reading, badminton, strategy games, anime.

Exploring new technologies, learning AI, and applying AI.

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with **over 2 years of hands-on experience**, capable of working **end-to-end**: from requirement analysis and solution consulting to complete system implementation. **Core strengths:** developing Web Admin, Web Client, and Mobile App ecosystems using **Javascript/Typescript** (ReactJS, Next.js, NestJS, React Native) and **PHP** (Laravel, MySQL). Directly architected and operated high-complexity solutions in **Logistics, E-commerce, and EdTech**.

TECHNICAL SKILLS

1. Frontend Web Development

ReactJS, Next.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS.

2. Backend & Systems Development

NestJS, ExpressJS, Laravel, PHP, RESTful API, JWT, ASP.NET MVC, Python.

3. Databases

MySQL, SQL Server, MongoDB, indexing, transactions.

4. Mobile & Desktop App Development

React Native, Android Java, Firebase, Google Maps API, .NET C# WinForms, Dev Express.

5. Tools & Supporting Skills

Git/GitHub, Agile/Scrum, basic Docker, basic CI/CD, requirement analysis, solution consulting.

ACHIEVEMENTS

- **Second Prize:** "Promising Programmer Search 2022 - 2023" competition (06/2023).
- **Scientific Research:** Excellent completion of a university-level research topic: "Managing and Storing IT Student Scores on a Blockchain Platform" (key member of a 3-person team).
- **University Consolation Prize:** Blockchain research project awarded at the university final round (09/2022).
- **EUREKA Research 2022:** Represented the university and received a certificate of contribution from the Ho Chi Minh Communist Youth Union.

WORK EXPERIENCE

1. COVASOL (covasol.com.vn) | Freelancer - Full Stack Developer | Sales

Role: Freelancer - Full Stack Developer | Sales

Timeline: 15/09/2025 - Present

Responsibilities: Led full-stack responsibilities across the entire project lifecycle: gathering and analyzing requirements, proposing technical solutions, designing system architecture, implementing frontend (web admin/client), building backend APIs, designing and optimizing databases, testing, and resolving issues before handover. Also collaborated with the Sales function to consult customers, clarify business scope, align implementation timelines, and provide consistent progress updates.

Impact: Ensured delivery matched agreed scope and timelines; improved system stability; reduced operational issues after release; and supported future development phases while increasing overall product quality at handover.

Technologies: ReactJS, Next.js, NestJS, ExpressJS, PHP, RESTful API, MySQL, Git/GitHub.

2. SOF Co., Ltd (sof.com.vn) | Full Stack Web Developer

Role: Full Stack Web Developer

Timeline: 31/03/2025 - 30/09/2025

Responsibilities: Developed the company's full-stack web system, including frontend, backend, REST APIs, and databases. Integrated third-party services such as Google Maps Platform API, PA Vietnam eInvoice, GHTK, GHN, and payment gateways (ZaloPay, VNPay, SePay) into operations. Worked closely with operations teams to analyze logistics requirements, optimize performance, and maintain web system stability.

Impact: Standardized web-based operation flows, improved user experience, increased system stability, and enabled faster rollout of new features.

Technologies: PHP, ReactJS, REST API, MySQL, Google Maps Platform API, PA Vietnam eInvoice API, GHTK API, GHN API, ZaloPay API, VNPay API, SePay API.

3. SOF Co., Ltd (sof.com.vn) | Mobile App Developer

Role: Mobile App Developer

Timeline: 01/10/2025 - 31/01/2026

Responsibilities: Directly developed mobile applications for core business operations; built key functional flows, integrated REST APIs, handled data synchronization, optimized app performance, and integrated Google Maps API for location and transportation tracking. Coordinated with operations teams to ensure a smooth and stable user experience.

Impact: Improved mobile user experience quality, increased stability in real-world operations, and supported feature expansion according to business needs.

Technologies: React Native, REST API, MySQL, Google Maps API.

4. IT VINA Co., Ltd (itvina.com) | Full-Stack Web Developer Intern

Role: Web Developer Intern

Timeline: 07/01/2024 - 31/12/2024

Responsibilities: Joined the technical team to develop interfaces and core functionalities for enterprise web systems; supported frontend module development, basic backend logic, API integration, and database operations based on feature requirements. Collaborated on testing, bug fixes, and performance tuning to ensure stable internal delivery.

Impact: Strengthened practical full-stack mindset and exposure to a full professional project lifecycle from requirement analysis and development to testing and handover; improved teamwork and problem-solving in an enterprise environment.

Technologies: Laravel, ReactJS, MySQL.

FEATURED PROJECTS

1. Multi-Platform Logistics Management System - SOF Co., Ltd

Overview: A transportation management ecosystem consisting of a customer app, driver app, and centralized web admin portal to coordinate orders in real-time.

Contributions: Designed and developed order creation, order-picking, and trip status update flows; integrated Google Maps API for driver tracking, distance calculation, and route monitoring on the admin web portal.

Outcome: Increased dispatching speed, improved operational accuracy, and enhanced real-time visibility of delivery status.

Technologies: React Native, ReactJS (Web Admin), Google Maps API, RESTful API.

Demo: https://sof.com.vn/san-pham/vantai/pricing

2. Tafas.vn - Women's Fashion E-commerce Platform

Overview: Tafas.vn is a women's fashion e-commerce platform including a customer-facing website and a centralized administration system for content, product, campaign, and member data management.

Contributions: Designed and built the admin platform architecture (base admin), implemented admin authentication and session-based authorization, developed modules for banners, news, static pages, product categories, sizes, and collections, and completed member/role/permission management features.

Outcome: Standardized internal operations on a single system, reduced manual work for content and product updates, shortened internal processing time, and improved data consistency and feature scalability.

Technologies: NestJS, Next.js, MySQL.

Demo: https://www.tafas.vn/

3. SmartMath - Educational Management Ecosystem (EdTech)

Overview: SmartMath is an educational management platform for training centers to manage student profiles, teacher information, classes, and learning progress in one centralized system.

Contributions: Developed the ReactJS user interface; built screens and business flows for student and teacher management; integrated ExpressJS APIs for data lookup, updates, and frontend-backend synchronization.

Outcome: Accelerated daily operations, improved learning data accuracy, and standardized educational center workflows.

Technologies: ReactJS, ExpressJS, Node.js.

Demo: https://smartmath.covasol.io.vn/

4. TCShop - Multi-Industry E-commerce Core Website

Overview: TCShop is a core multi-industry e-commerce website project focused on building a centralized admin platform for complete operations including product catalog, sales content, orders, logistics, suppliers, and customer data.

Contributions: Built the admin platform and implemented key business modules: articles, product reviews, orders, promotions, warranties, inventory inbound, inventory history, supplier management, and customer management; standardized data flows across departments for stable operations and easy expansion.

Outcome: Enabled unified business operations, reduced manual tasks, improved real-time data control, and shortened processing time for warehouse, order, and customer-care workflows.

Technologies: PHP, Laravel 11, MySQL.

Demo: https://youtu.be/pMGjSCBlxDY

5. Multi-Industry Marketing Landing Page Set

Overview: A project group building multiple landing pages for hospitality, events, restaurants, fashion, and beverages, focused on user experience, performance, and conversion optimization.

Contributions: Designed content structures aligned with marketing goals, developed responsive desktop/mobile interfaces, optimized CTA and contact-form layouts, and standardized reusable UI components across multiple landing pages.

Outcome: Ensured campaigns could launch quickly with consistent, scalable interfaces and made content updates more efficient for marketing operations.

Technologies: Next.js, Tailwind CSS, TypeScript.
